- ✓ Clean Air Filter
- ✓ Test Run Machine

*New spark plug is optional

**Mower only

Supporting Pre-Professional Activities, Industry and Academia Tours, & ASABE Activities!

Reminder: Is your check or money order included with this form?

On **Thursday, October 24th** through **Saturday, October 26th** the UW-Madison American Society of Agricultural and Biological Engineers (ASABE) will hold its annual lawn mower, snow blower, and roto-tiller clinic. This clinic is designed to winterize and provide preventative maintenance for your machine before the upcoming season. The cost of this service is \$30.00 per machine with options including a new spark plug (\$5 extra) and/or a new air filter (\$15 extra).

Machines may be brought to the Agricultural Engineering Lab (SW corner of Elm and Observatory Drive) between noon and 8:00 p.m. on Thursday, October 24th or 8:00 am to 6:30 p.m. on Friday, October 25th. Your machine will be ready to be picked up Saturday between 8 a.m. and 12 p.m. Please respond promptly as this year we are **limiting the number of machines to 100** to ensure a high quality of service. If you return a request and we cannot winterize your machine, we will contact you. For an additional charge, we will pick up and deliver your machine(s) in Madison, Middleton, and Monona. Machines will be picked up Thursday evening or Friday (all day) and will be returned Saturday. Sorry, we do not accept reel type mowers, garden tractors, or riding lawn mowers. Because this is a winterizing clinic, we are not prepared to repair equipment. Therefore, we can only accept machines that are currently operational. Enclosed are two copies of the for, feel free to share with neighbors and friends!
