TOTAL for Degree – Minimum 125 Credits Required (no course can be counted twice)

To be admitted to the degree-granting designation of ABE (biological systems engineering), a student must have:

1. A minimum of 24 degree credits.
2. A minimum of 17 graded credits of calculus, statistics, chemistry, biology, computer science, statics and physics courses required for a BSE degree. Advanced Placement credits cannot be counted.
3. A BSE *Math and Science Grade Point Average* (MSGPA) of at least 2.65 with a minimum grade of C in every course used to calculate the MSGPA. The MSGPA is based on the following (and only the following) courses: all math courses 217 and above (except Math 228); statistics courses 224 and above; all chemistry courses (i.e., all CHEM courses); up to three biology courses (i.e., any courses with a UW-Madison "Biological" breadth designation); computer science courses 302 and above (except CS 402); EMA 201; and Physics courses 201 and above. For any course that a student repeats, only the most recent grade will be used in the calculation. Any transfer course from another university that is included in the previous list must be included in the GPA calculation. There is no limit on the number of courses a student can retake or on the number of times a student can retake a specific course.
4. Successful completion of introductory chemistry (Chem 103/104 or 109 or equivalent) and math through Math 222.
